RC3 LONG NIGHT OF RESEARCH 1ST EDITION, 23 MARCH 2023 Covid-19 and Volunteerism across the RCRC Movement

Annabelle Jaccard Clinical psychologist and doctor in psychopathology and psychoanalysis

Hamed Seddighi Postdoctoral Researcher, Clinical Psychology and Experimental Psychopathology Department, University of Groningen

Khoudia Sow Medical doctor and anthropologist, Regional Centre for Clinical Management and Training of the Infectious Diseases, Fann Hospital in Dakar

Moderated by Virginie Troit, Director Vincent Leger, Research Officer French Red Cross Foundation for Humanitarian and Social Research – Paris

Kind reminder:

During the session:

- Rename yourself: Full Name + Organization
- Mute your microphone
- Keep your video on. Switch off if low connectivity

If you have questions to the speakers:

- **Ideally:** Use the Q&A feature to ask your question
- **Second option:** Use the raise hand feature, the moderator will ask you to unmute yourself.

If you have IT questions:

• Ask your question in the chat, an administrator will help you.

Confidentiality statement and data protection

- Sessions will be recorded
- Participants commit not taking pictures of screen or of other participants without permission
- If slides are posted on the shared screen, the speaker should inform the participants if they will receive the slides.

Covid-19 and Volunteerism across the RCRC Movement

Purpose:

- Little is known on volunteers' involvement in an epidemic response.
- Some studies have demonstrated the effectiveness of volunteer action in supporting epidemic response interventions.
- Others have highlighted the institutional, social and psychological factors that affect the well-being of those involved, as well as factors associated with resilience and post-event burnout.
- This roundtable invites scientists and practitioners to share reflections and research results on the benefits and challenges of volunteers' involvement in the Covid-19 epidemic response across the RCRC movement

Covid-19 and Volunteerism across the RCRC Movement

Programme:

- 1) Presentation of the French red cross Foundation's Covid-19 emergency research programme (15 mns)
- Open discussion with the participants & the audience (60 mns)

Our engagement with research: creating new spaces bridging science and civil society organisations

The French Red Cross Foundation is a recognised public utility foundation dedicated to **research**, which aims to improve the practices in the fields of humanitarian and development action, in France and around the world, by supporting researchers and developing collaborative projects with academic institutions. To achieve its mission, the Foundation is guided by the values and principles of the International Red Cross and Red Crescent Movement and is based on the expertise and scientific methodologies that underpin its identity and guarantee its effectiveness.

An imperative: increased research in the field of social and humanitarian action

Inclusivity and diversity in research

One purpose: general interest and common goods

An approach : co-construction

Our core value: participating in the transformation of humanitarian and social action through field research and an othical approach

3 priority research areas to innovate and find sustainable solutions

Access to health and epidemics

Understanding situations and sanitary needs of the populations, taking into account the socio-cultural dimensions in actions relating to access to care, prevention and health systems.

2. Migrations and displacements

Better identifying the origin and sources of migration, strategies and experiences of exiled, as well as the relevance of the humanitarian response. Supporting a renewal of practices around this issue, which has become worldwide.

3. Risks and disasters

Studying the causes of the populations' vulnerability, the relevance of their preparation, their perception of risks and the innovative humanitarian responses tested in the most affected areas.

An ethical approach

Placing the individual at the centre of the action, understanding what is essential to him/her, respecting his/her dignity.

Listening to the actors in the field Collect questions and **Our mission** needs with practitioners, volunteers and university students. Fragilities **Disseminate results** and contribute to 8 vulnerabilitie change S Valuing and translating Transforms the needs into results to raise research questions awareness the academic Structuring world, the civil society, programs of decision-makers and search and select citizens. the most researchers relevant Accompanying researchers Building bridges with the

networks, mobilize networks, provide funding, support and expertise to researchers.

1. Engagement as an important axis of research

Volunteering in epidemic context – 10 research projects led by the Foundation based on WHO recommandations for social sciences New processes for research in time of emergency Our programs on and with volunteers

2. To Improve connection between volunteers, organizations and research

RCRC Research Consortium (RC3) Flagship researches a. Volunteering and research – Global Forum 2023 b. Heatwaves / led by IFRC Climate Center and IFRC GDPC New opportunities Academic volunteering Science shops

3. Engagement as a driver of research and change

BENEVO'LAB : a new programme launched by French Red Cross / Foundation Research needs & questions are driven by volunteers One year team with a researcher Recommandations based on a scientific apporach

RC3 LONG NIGHT OF RESEARCH 1ST EDITION, 23 & 24 MARCH 2023

"How can research make a difference on volunteering?"

Social Science in time of emergency: how to adapt?

INTERNATIONAL

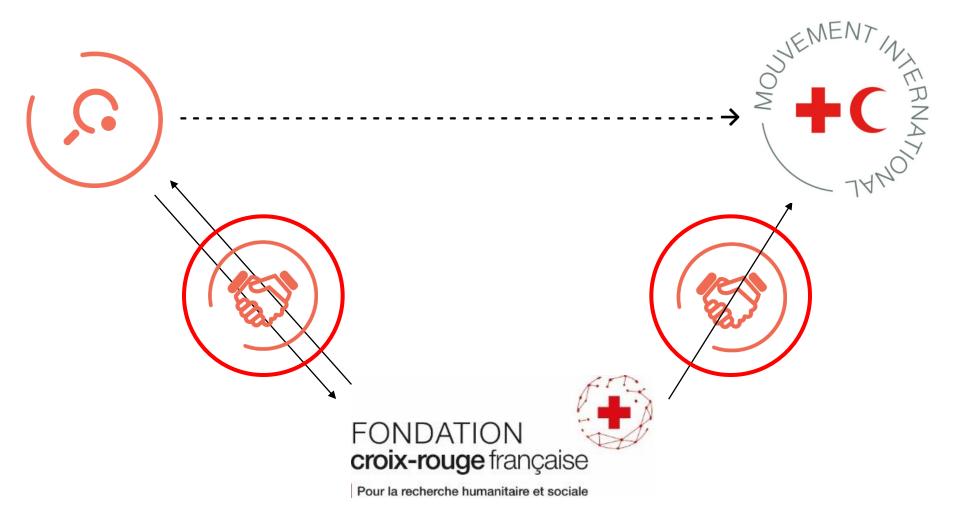

Pour la recherche humanitaire et sociale

The Foundation, between humanitarian and scientific actors

The 3 main challenges

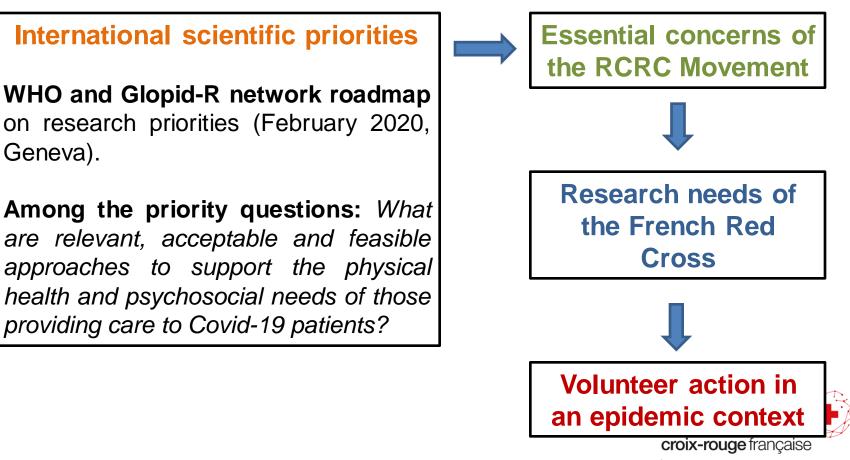

Challenges	Objectives	Solutions
Time	Start research as soon as possible	New "flash calls" procedure with new decision-making mode for Governance
Quantity	Support as much research as possible	Solicitation of scientists to undertake research for free (research apart from calls) Mobilization of partners and donors Prioritization of Covid research by the Foundation team
Quality	Support research useful to operational staff	Focus on a cross-cutting theme Consultation of IFRC and French Red Cross teams to understand the field concerns

A cross-cutting theme: volunteer action in an epidemic context

First "flash" calls launched in March and May 2020

"Volunteers in an epidemic context: representations and dynamics around this essential player in the response to Covid-19" (launched twice)

<u>Eligible territories:</u> Metropolitan France and/or the most affected overseas territories

"Covid-19 in Africa: what role for volunteers for resilient action? »

<u>Eligible territories:</u> Burkina Faso, Burundi, Comoros, Ivory Coast, Cameroon, Guinea, Madagascar, Mali *(resident researchers only)*, Mauritius, Niger *(resident researchers only)*, Senegal

"Fight against Covid-19: what social impact of health measures for the most vulnerable? »

<u>Eligible Territories:</u> Burkina Faso, Burundi, Ivory Coast, Cameroon, Metropolitan and Overseas France, Guinea, Haiti, Madagascar, Mali *(resident researchers only)*, Niger *(resident researchers only)*, Senegal

Challenges of research in time of emergency

Adapt to operational needs				
• Lack of availability of French Red Cross teams,	\rightarrow delays in communicating field concerns and			
caught up in the emergency	coordinating research implementation.			
• Modified decision-making chains to respond to	→ difficulty finding adequate contacts to facilitate			
epidemic priorities	access for researchers to people, data and places.			
• Rapid evolution of research needs and questions	→ difficulty in keeping field concerns up to date and			
throughout the health crisis	anticipating the next relevant research questions.			
Adapt to the rigid legal and ethical framework for research				
• Issue of the management of Red Cross personal	\rightarrow delay in making data available for a use that Red			
data for research purposes	Cross lawyers are not used to.			
• Complex drafting of research protocols and	\rightarrow difficulty in formalizing and then integrating all			
agreements between the research teams, the	the needs and expectations of researchers and			
French Red Cross teams and the Foundation	operational staff into a common roadmap.			
• Long time for researchers to obtain opinions from	→ delay in starting research.			
Ethics Committees.				

Lessons learned

1. Humanitarian and social actors must learn to transmit their research needs to researchers for work and results useful for more effective action.

2. This implies a better understanding on the part of researchers of the institutional constraints weighing on these organizations and of the need to identify common objectives for exploiting the results.

3. Need to support and accompany researchers to obtain funding and to study the fields of intervention of humanitarian and social actors.

4. Defend qualitative and empirical SHS approaches, underrepresented in the research effort.

5. Fight against inequalities in research, by opening funding opportunities to researchers and laboratories from countries in the South.

Question

What are the main findings of your research on volunteering in epidemic contexts, and how can they be useful to humanitarian organisations? / Quels sont les principaux résultats de vos recherches sur le volontariat en contexte épidémique, et en quoi peuvent-ils être utiles aux organisations humanitaires ?

Dan Ferrand-Bechmann Sociologist, Professor Emeritus of the University of Paris 8

Annabelle Jaccard Clinical psychologist and doctor in psychopathology and psychoanalysis

Hamed Seddighi Postdoctoral Researcher, Clinical Psychology and Experimental Psychopathology Department, University of Groningen

Khoudia Sow Medical doctor and anthropologist, Regional Centre for Clinical Management and Training of the Infectious Diseases, Fann Hospital in Dakar

Question

What are the added values and challenges of collaboration between researchers and humanitarian organisations, and what advice would you give to improve this collaboration? / Quels sont les valeurs ajoutées et défis de la collaboration entre chercheurs et organisations humanitaires, et quels conseils donneriez-vous pour améliorer cette collaboration ?

Dan Ferrand-Bechmann Sociologist, Professor Emeritus of the University of Paris 8

Annabelle Jaccard Clinical psychologist and doctor in psychopathology and psychoanalysis

Hamed Seddighi Postdoctoral Researcher, Clinical Psychology and Experimental Psychopathology Department, University of Groningen
